Sampling made safe, easy and flexible

Stay compliant with sewerage and drainage act (SDA)
Liquistation CSF48 and portable Liquiport 2010 CSP44

Water quality, discharges, regulations, the environment ...rely on a trusted partner

Our automatic water samplers are suitable for numerous applications, such as:

- Water sampling
- Storm water sampling
- Surface water sampling
- River sampling
- Well sampling
- Process water monitoring
- Product sampling for quality verification
- Wastewater sampling
- Pretreatment sludge sampling

For more informations about Memosens and Heartbeat Technology, simply log-on to www.sg.endress.com

Safe for water and processes

- Be it in wastewater, surface water or drinking water, Liquistation and Liquiport comply with worldwide legislation
- Safe sample handling: Failsafe temperature control prevents sample corruption
- Simple commissioning: Open communication standards make integration into your process much easier
- Simple operation: A uniform menu for all devices, no matter if samplers or Liquiline field device. Say goodbye to operating errors.

People for Process Automation

Flexible and safe operation

Simply flexible

- Easy, menu-guided sample programming and tool-free maintenance
- Can be easily upgraded to complete measuring stations offering real plug and play for Memosens sensors

Simply safe

- No more corrupt samples due to temperature variations.
- No more samples lost by vandalism
- On-board data storage

Simply pays off

- Enhanced monitoring features allow program initiation based on an event - automatically
- Thanks to the consistent system, the number of spare parts on your stock reduces to an absolute minimum

Flexible & modular communication – upgrade & update possible at all times:
