

Leading market position

Frost & Sullivan recognizes Endress+Hauser with the Global Market Leadership Award for electromagnetic flowmeters

With an installed base of more than two million instruments, Endress+Hauser is the market leader in electromagnetic flowmeters. After extensive market and competitive research, the market research and consulting firm Frost & Sullivan honored Endress+Hauser with the Global Market Leadership Award.

The company was recognized during Frost & Sullivan's awards gala in California. "Endress+Hauser's success is tied to a strong customer focus and a high level of innovation," says Dr. Rajender Thusu, Frost & Sullivan Industry Analyst. The company invests heavily in research and product development in order to meet its customers' requirements in the area of liquid flow measurements.

Frost & Sullivan highlighted the company's close collaboration with customers. "Our aim is to help our customers run their processes in a reliable, safe, sustainable and economic manner. To do that, we work closely together with the customers from the very early stages of product design, to the operations phase and beyond," says Dr. Bernd-Josef Schäfer, Managing Director of Endress+Hauser Flowtec, the Group's competence center for flow measurement technology headquartered in Reinach, Switzerland.

Products and services for individual requirements

The Endress+Hauser product portfolio of electromagnetic flowmeters guarantees precise measurement of volume flow without restricting production flow rates or causing any pressure drop. The result is less downtime and increased productivity, which contributes to lower overall operational costs. "Most of our customers value the combination of state-of-the-art electromagnetic flow measurement instruments and the wide range of services that we offer," emphasizes Bernd-Josef Schäfer.

Apart from the extensive portfolio of measurement instruments, Endress+Hauser also offers global support services that enable customers to optimize their processes over the plant's entire life cycle, thus making the company more competitive. This includes calibration, diagnosis, repair, engineering, commissioning and maintenance services.

Leading technologies

The electromagnetic flowmeters from Endress+Hauser, which feature advanced engineering such as Heartbeat Technology, support various communications protocols, including EtherNet/IP and PROFINET, that make the information easily accessible. Thanks to Heartbeat Technology, instruments such as the Proline flowmeter line have self-monitoring capabilities. By supplying process and instrument diagnostic notifications in line with NE 107, influences and changes can be detected and rectified before impacting the process – all while the process is running.

EH_Market Leadership_1.jpg

Frost & Sullivan recognizes Endress+Hauser with the Global Market Leadership Award for electromagnetic flowmeters.

EH_Market Leadership_2.jpg

Endress+Hauser manufactures flow measurement technology at six locations in Switzerland, France, the United States, China, India, and Brazil with state-of-the-art production logistics.

EH_Market Leadership_3.jpg

Endress+Hauser calibrates flowmeters around the world in accordance with the same standards. The new plant in Suzhou, China is designed for extremely large instruments with diameters of up to 3,000 millimeters.

The Endress+Hauser Group

Endress+Hauser is a global leader in measurement instrumentation, services and solutions for industrial process engineering. The Group employs more than 13,000 personnel across the globe, generating net sales of over 2.2 billion euros in 2017.

Structure

With dedicated sales centers and a strong network of partners, Endress+Hauser guarantees competent worldwide support. Our production centers in 12 countries meet customers' needs and requirements quickly and effectively. The Group is managed and coordinated by a holding company in Reinach, Switzerland. As a successful family-owned business, Endress+Hauser is set for continued independence and self-reliance.

Products

Endress+Hauser provides sensors, instruments, systems and services for level, flow, pressure and temperature measurement as well as analytics and data acquisition. The company supports customers with automation engineering, logistics and IT services and solutions. Our products set standards in quality and technology.

Industries

We work closely with the chemical, petrochemical, food & beverage, oil & gas, water & wastewater, power & energy, life science, primaries & metal, renewable energies, pulp & paper and shipbuilding industries. Endress+Hauser supports its customers in optimizing their processes in terms of reliability, safety, economic efficiency and environmental impact.

History

Founded in 1953 by Georg H Endress and Ludwig Hauser, Endress+Hauser has been solely owned by the Endress family since 1975. The Group has developed from a specialist in level measurement to a provider of complete solutions for industrial measuring technology and automation, with constant expansion into new territories and markets.
